Austria: professor Stefan Schleicher  
disseminate the results of academic activities  
promote exchange of knowledge and views  
promote academic debate  
Publication of 3 books

Decisions about energy policy are a very difficult task. I usually illustrate this with two figures:

#### 4 years versus 40 years

4 years is time for which a politician is in most countries elected to the parliament  
40 years is a reasonable time horizon for planning our energy vision or strategy.
